Double Actuator

The double actuator gives more strength to the unit, higher top loads can be 90° tilted, if one gets broken the second one can still move the unit in emergency situations.

The feet can be adjusted for the most suitable mounting on the roof.

The unit has Plug & Play connectors for an easy and quick installation.

The air compressors are integrated under the base cover.

Tilt & Turn units

The Fireco **TILT & TURN UNITS** have almost become a standard for the electropneumatic Roof masts. The system is easy and reliable and permits to tilt the lamps (or the equipment) 335° and to turn 365°. There are many different models in order

to provide a solution to all the possible needs. Independent tilting of the arms is also possible. Combined with the multifunctional remote control, the system becomes a complete unit, ready to be used and very easy to be controlled.

TILT & TURN UNIT NOVA 2 MOTORS

TT.36151 = 12V
TT.36152 = 24V

Compact and easy to use, the maximum top load is 40kg. Available 12V and 24V, suitable for the most common applications. It will be supplied with a set of quick connectors for each floodlight (to be ordered separately).

TILT AND TURN UNIT NOVA WITH INDEPENDENT TILTING OF THE ARMS (3 MOTORS)

TT.36161 = 12V
TT.36162 = 24V

The arms can be tilted independently for a wider illumination capacity. The maximum top load is 50kg. Available 12V and 24V. It will be supplied with a set of quick connectors for each floodlight (to be ordered separately).

Inside focus system on tilt and turn unit Nova

The **INSIDE FOCUS SYSTEM** allows you to mount on the tilt and turn unit a motorized lamp unit, for increasing or focusing the lighting beam angle (+46°/-4°).

It can be equipped with **40W LED, 50W LED, 90W LED, Hella 42W Xenon or Hella Power Beam 3000** floodlights.

The tilt and turn unit allows you to turn the complete unit 365° and to tilt it 335°, furthermore you can move the arms -4° and +46° like shown in the pictures.

This will permit you to illuminate a wide area and to direct the lighting beam to the required direction. All the functions of this unit can be controlled by one multifunctional remote control.

Multifunctional remote controls with electronic board

The FIRECO multifunctional remote control permits you to control ALL the functions of the mast with just one remote control. The remote control is easy and safe to use, thanks to the automatic block of the keypad and easy to understand functions.

The mast with the multifunctional remote control is supplied with an electronic board and an electrovalves group.
